

Document Information

Field	Details
Document Title	Software Requirements Specification
Project Name	Tripva
Application Type	Travel Booking Web Application
Document Version	1.0
Prepared By	Shyamalan M
Document Type	SRS

Introduction

Purpose

The purpose of this Software Requirements Specification is to document the functional and non-functional requirements of the Tripva web application.

This document provides the requirements that will be used as the basis for designing and executing manual test scenarios and test cases.

Scope

Tripva is a travel-focused web application that provides users with travel-related services and information.

The currently available functionality includes the website navigation, bus search interface, popular routes, early-access/notification functionality, and informational sections.

Some advertised services are currently unavailable or presented as preview/locked features and are therefore not considered functional requirements for current test execution.

Product Overview

Tripva provides a web interface through which users can explore available travel services and interact with currently available features.

The application currently presents:

- Bus search functionality
- Popular travel routes
- Early-access/notification functionality
- Upcoming travel services
- Informational content
- Website navigation and footer links

User Role

Guest User

The Guest User can access the Tripva website without logging in.

The user shall be able to:

- Access the Tripva home page.
- Navigate through available sections.
- View available travel information.
- Interact with available bus search fields.
- View popular routes.
- Use the available notification/early-access functionality.
- Access available informational links.

Functional Requirements

Home Page Requirements

Requirement ID	Requirement Description
FR-HOME-001	The system shall display the Tripva home page when the website is accessed.
FR-HOME-002	The system shall display the main navigation options.
FR-HOME-003	The system shall display the available travel-related sections.
FR-HOME-004	The system shall allow users to navigate to available sections through the provided links or buttons.

Bus Search Requirements

Requirement ID	Requirement Description
FR-BUS-001	The system shall display the bus search interface.
FR-BUS-002	The system shall provide a field for selecting the departure location.
FR-BUS-003	The system shall provide a field for selecting the destination location.
FR-BUS-004	The system shall provide a journey date selection option.
FR-BUS-005	The system shall provide a Search Buses option.
FR-BUS-006	The bus search functionality shall indicate that the feature is currently available in preview mode, where applicable.

Popular Routes Requirements

Requirement ID	Requirement Description
FR-ROUTE-001	The system shall display popular travel routes.
FR-ROUTE-002	The system shall display the route information clearly.
FR-ROUTE-003	The system shall provide available interaction/navigation for popular routes.

Notification / Early Access Requirements

Requirement ID	Requirement Description
FR-NOTIFY-001	The system shall provide an option for users to request travel service updates or early access.
FR-NOTIFY-002	The system shall provide an email input field where required.
FR-NOTIFY-003	The system shall allow the user to submit the notification/early-access request.
FR-NOTIFY-004	The system shall validate the email input where applicable.

FR-NOTIFY-005	The system shall provide appropriate feedback after submission.
---------------	---

Navigation Requirements

Requirement ID	Requirement Description
FR-NAV-001	The system shall allow users to navigate between available sections of the website.
FR-NAV-002	Navigation links shall redirect users to the corresponding section or page.
FR-NAV-003	The system shall provide access to available footer navigation links.

Informational Requirements

Requirement ID	Requirement Description
FR-INFO-001	The system shall display information about Tripva and its services.
FR-INFO-002	The system shall display information about upcoming services or features.
FR-INFO-003	The system shall provide access to available Privacy Policy information.
FR-INFO-004	The system shall provide access to available Terms and Conditions information.
FR-INFO-005	The system shall provide available contact information or contact functionality.

Non-Functional Requirements

Usability

The website shall provide a clear and user-friendly interface that allows users to understand and interact with the available features.

Compatibility

The website should be accessible through supported modern web browsers.

Performance

The website should respond to normal user interactions within an acceptable time under normal conditions.

Availability

The currently available website functionality should be accessible to users when the application is operational.
