

		Step No	Description		
TC - HOME-001 - Open Tripva home page					
TS-HOME-001	TC-HOME-001	1	Open Google Chrome.	Chrome should open successfully.	
		2	Enter the Tripva URL in the address bar and press Enter.	Tripva website should load successfully.	
		3	Observe the page.	Tripva home page should be displayed.	
TC - HOME-002 - Verify home page refresh					
TS-HOME-001	TC-HOME-002	1	Open the Tripva home page.	Home page should be displayed.	
		2	Refresh the browser page.	Page should reload successfully.	
		3	Observe the page.	Home page should remain functional and display correctly.	
TC - HOME-003 - Verify page title					
TS-HOME-001	TC-HOME-003	1	Open the Tripva home page.	Home page should be displayed.	
		2	Observe the browser tab title.	Appropriate Tripva page title should be displayed.	
TC - HOME-004 - Verify Tripva logo					
TS-HOME-001	TC-HOME-004	1	Open the Tripva home page.	Home page should be displayed.	
		2	Observe the Tripva logo.	Tripva logo should be displayed clearly.	
		3	Click the logo if it is clickable.	User should be taken to the home page.	
TC-HOME-005 - Verify home page content					
TS-HOME-001	TC-HOME-005	1	Open the Tripva home page.	Home page should be displayed.	
		2	Scroll through the complete page.	Available sections should be displayed correctly.	
		3	Observe the content.	Text, images, buttons and other visible elements should be displayed without broken or missing content.	
TC-HOME-006 - Verify home page using browser back and forward					
TS-HOME-001	TC-HOME-006	1	Open the Tripva home page.	Home page should be displayed.	
		2	Navigate to an available page/section.	Selected page/section should open.	
		3	Click the browser Back button.	Previous page/state should be restored correctly.	
		4	Click the browser Forward button.	Next page/state should be restored correctly.	
TC-HOME-007 - Verify direct URL access					
TS-HOME-001	TC-HOME-007	1	Open a new Chrome tab.	New tab should open.	
		2	Enter the Tripva URL directly.	Tripva website should load.	
		3	Observe the page.	Home page should be displayed correctly.	
TS-HOME-002 - Verify Main Navigation Options					

TS-HOME-002	TC-HOME-008	1	Open the Tripva website.	Home page should be displayed.	
		2	Observe the main navigation area.	Available navigation options should be displayed clearly.	
		3	Verify the text of the navigation options.	Navigation labels should be readable and correctly displayed.	
TC-HOME-009 - Verify navigation option responds to click					
TS-HOME-002	TC-HOME-009	1	Open the Tripva website.	Home page should be displayed.	
		2	Click an available navigation option.	Navigation option should respond to the click.	
		3	Observe the result.	Corresponding section/page should be displayed.	
TC-HOME-010 - Verify navigation options are not duplicated					
TS-HOME-002	TC-HOME-010	1	Open the Tripva website.	Home page should be displayed.	
		2	Observe the main navigation.	Each navigation option should be displayed appropriately without unintended duplicate options.	
TC-HOME-011 - Verify navigation after page refresh					
TS-HOME-002	TC-HOME-011	1	Open the Tripva website.	Home page should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Observe the navigation.	Navigation options should remain available and functional.	
TS-HOME-003 - Verify Navigation to Available Sections					
TS-HOME-003	TC-HOME-012	1	Open the Tripva website.	Home page should be displayed.	
		2	Select each available navigation option one at a time.	Corresponding section/page should be displayed for each option.	
		3	Return to the home page between selections where required.	Home page should be accessible.	
TC-HOME-013 - Verify navigation destination					
TS-HOME-003	TC-HOME-013	1	Open the Tripva website.	Home page should be displayed.	
		2	Click an available navigation option.	Navigation should occur.	
		3	Compare the displayed destination with the selected option.	The correct corresponding section/page should be displayed.	
TC-HOME-014 - Verify navigation from different page positions					
TS-HOME-003	TC-HOME-014	1	Open the Tripva website.	Home page should be displayed.	
		2	Scroll to different positions of the page.	Page should scroll correctly.	
		3	Use an available navigation option.	User should be taken to the corresponding destination correctly.	
TS-HOME-004 - Verify Available Action Buttons					
TS-HOME-004	TC-HOME-015	1	Open the Tripva website.	Home page should be displayed.	
		2	Identify the available action buttons.	Action buttons should be visible and readable.	
TC-HOME-016 - Verify action button click					
TS-HOME-004	TC-HOME-016	1	Open the Tripva website.	Home page should be displayed.	

		2 Click an available action button.	Button should respond to the click.	
		3 Observe the result.	The corresponding action or navigation should occur.	
TC-HOME-017 - Verify action button after refresh				
TS-HOME-004	TC-HOME-017	1 Open the Tripva website.	Home page should be displayed.	
		2 Refresh the page.	Page should reload	
		3 Click an available action button.	Button should remain functional after refresh.	
TS-BUS-001 - Verify Bus Search Interface				
TS-BUS-001	TC-BUS-001	1 Open the Tripva website.	Home page should be displayed.	
		2 Navigate to the bus search section.	Bus search section should be displayed.	
		3 Observe the complete search interface.	All available search elements should be displayed correctly.	
TC-BUS-002 - Verify From field				
TS-BUS-001	TC-BUS-002	1 Navigate to the bus search section.	Bus search section should be displayed.	
		2 Observe the From field.	From field should be visible and clearly labelled.	
		3 Click the From field.	Field should accept user interaction.	
TC-BUS-003 - Verify To field				
TS-BUS-001	TC-BUS-003	1 Navigate to the bus search section.	Bus search section should be displayed.	
		2 Observe the To field.	To field should be visible and clearly labelled.	
		3 Click the To field.	Field should accept user interaction.	
TC-BUS-004 - Verify journey date field				
TS-BUS-001	TC-BUS-004	1 Navigate to the bus search section.	Bus search section should be displayed.	
		2 Observe the journey date field.	Date field should be displayed correctly.	
		3 Click the date field.	Date selection control should respond.	
TC-BUS-005 - Verify Search Buses button				
TS-BUS-001	TC-BUS-005	1 Navigate to the bus search section.	Bus search section should be displayed.	
		2 Observe the Search Buses button.	Button should be visible and readable.	
		3 Click the button.	Application should respond according to the currently available functionality.	
TC-BUS-006 - Verify bus search interface after page refresh				
TS-BUS-001	TC-BUS-006	1 Open the bus search section.	Bus search section should be displayed.	
		2 Refresh the browser page.	Page should reload successfully.	
		3 Observe the bus search interface.	Search interface should remain properly displayed.	
TC-BUS-007 - Verify search fields accept valid data				

TS-BUS-001	TC-BUS-007	1	Enter/select a valid departure location.	Departure location should be accepted/displayed.	
		2	Enter/select a valid destination.	Destination should be accepted/displayed.	
		3	Select an available journey date.	Selected date should be displayed correctly.	
TC-BUS-008 - Verify search interface alignment					
TS-BUS-001	TC-BUS-008	1	Open the bus search section.	Section should be displayed.	
		2	Observe the From, To, Date and Search Buses elements.	Elements should be properly aligned without overlap.	
TS-BUS-002 - Verify Selection of Departure Location					
TC-BUS-009 - Select a valid departure location					
TS-BUS-002	TC-BUS-009	1	Open the bus search section.	Bus search section should be displayed.	
		2	Click the From field.	From field should become active.	
		3	Enter a valid departure location.	Matching location options should be displayed.	
		4	Select the required location.	Selected location should be displayed in the From field.	
TC-BUS-010 - Verify departure location search					
TS-BUS-002	TC-BUS-010	1	Click the From field.	Field should be active.	
		2	Enter part of a valid location name.	Relevant matching locations should be displayed.	
		3	Select a location from the results.	Selected location should populate the From field.	
TC-BUS-011 - Verify changing selected departure location					
TS-BUS-002	TC-BUS-011	1	Select a departure location.	Location should be displayed.	
		2	Click the From field again.	Field should allow modification.	
		3	Select another location.	Previous location should be replaced with the newly selected location.	
TC-BUS-012 - Verify blank departure location					
TS-BUS-002	TC-BUS-012	1	Open the bus search section.	Bus search section should be displayed.	
		2	Leave the From field blank.	From field should remain empty.	
		3	Attempt to continue/search.	Application should handle the missing departure location appropriately.	
TC-BUS-013 - Verify departure location with leading/trailing spaces					
TS-BUS-002	TC-BUS-013	1	Click the From field.	Field should become active.	
		2	Enter a valid location with leading/trailing spaces.	Application should handle the spaces appropriately.	
		3	Observe the selected value.	Valid location should be displayed correctly without unintended formatting issues.	
TC-BUS-014 - Verify departure and destination can be different					
TS-BUS-002	TC-BUS-014	1	Select a departure location.	Departure location should be displayed.	
		2	Select a different destination location.	Destination should be displayed.	
		3	Observe both fields.	From and To locations should remain correctly populated.	

TS-BUS-003 - Verify Selection of Destination Location					
TC-BUS-015 - Select a valid destination location					
TS-BUS-003	TC-BUS-015		1 Open the bus search section.	Bus search section should be displayed.	
			2 Click the To field.	To field should become active.	
			3 Enter a valid destination.	Matching destination options should be displayed.	
			4 Select the required destination.	Selected destination should be displayed in the To field.	
TC-BUS-016 - Search destination using partial text					
TS-BUS-003	TC-BUS-016		1 Click the To field.	Field should become active.	
			2 Enter part of a valid destination name.	Relevant matching destinations should be displayed.	
			3 Select a destination.	Selected destination should populate the To field.	
TC-BUS-017 - Change selected destination					
TS-BUS-003	TC-BUS-017		1 Select a destination.	Destination should be displayed.	
			2 Open the To field again.	Field should allow modification.	
			3 Select another destination.	Previous destination should be replaced with the newly selected destination.	
TC-BUS-018 - Verify blank destination					
TS-BUS-003	TC-BUS-018		1 Open the bus search section.	Bus search section should be displayed.	
			2 Leave the To field blank.	To field should remain empty.	
			3 Attempt to continue/search.	Application should handle the missing destination appropriately.	
TC-BUS-019 - Verify same From and To location					
TS-BUS-003	TC-BUS-019		1 Select a departure location.	Departure location should be displayed.	
			2 Select the same location as destination.	Application should handle the same source and destination appropriately.	
TC-BUS-020 - Verify destination with leading/trailing spaces					
TS-BUS-003	TC-BUS-020		1 Click the To field.	Field should become active.	
			2 Enter a destination with leading/trailing spaces.	Application should handle the spaces appropriately.	
			3 Observe the selected value.	Destination should be displayed correctly.	
TC-BUS-021 - Verify destination remains selected after other field interaction					
TS-BUS-003	TC-BUS-021		1 Select a destination.	Destination should be displayed.	
			2 Select a journey date.	Date should be displayed.	
			3 Observe the To field.	Previously selected destination should remain unchanged.	
TS-BUS-004 - Verify Selection of Journey Date					
TC-BUS-022 - Select a valid future journey date					
TS-BUS-004	TC-BUS-022		1 Open the bus search section.	Bus search section should be displayed.	

		2	Click the journey date field.	Date selector should be displayed.	
		3	Select an available future date.	Selected date should be displayed correctly.	
TC-BUS-023 - Verify current date selection					
TS-BUS-004	TC-BUS-023	1	Open the journey date selector.	Date selector should be displayed.	
		2	Attempt to select the current date.	Application should handle the current date according to its date-selection rules.	
TC-BUS-024 - Verify past date selection					
TS-BUS-004	TC-BUS-024	1	Open the journey date selector.	Date selector should be displayed.	
		2	Attempt to select a past date.	Past journey date should not be accepted if past dates are restricted.	
TC-BUS-025 - Change selected journey date					
TS-BUS-004	TC-BUS-025	1	Select a journey date.	Selected date should be displayed.	
		2	Open the date selector again.	Date selector should be available.	
		3	Select another date.	Previous date should be replaced by the newly selected date.	
TC-BUS-026 - Verify date format					
TS-BUS-004	TC-BUS-026	1	Select an available journey date.	Date should be selected.	
		2	Observe the date field.	Date should be displayed in the application's defined format.	
TC-BUS-027 - Verify date remains selected after field interaction					
TS-BUS-004	TC-BUS-027	1	Select a journey date.	Date should be displayed.	
		2	Select/modify the From or To field.	Selected location should be updated.	
		3	Observe the date field.	Previously selected date should remain unchanged.	
TC-BUS-028 - Verify date selector navigation					
TS-BUS-004	TC-BUS-028	1	Open the journey date selector.	Date selector should be displayed.	
		2	Navigate to another available month/date range.	Date selector should navigate correctly.	
		3	Select an available date.	Selected date should be displayed correctly.	
TS-BUS-005 - Verify Search Buses Option					
TC-BUS-029 - Verify Search Buses button is displayed					
TS-BUS-005	TC-BUS-029	1	Open the bus search section.	Bus search section should be displayed.	
		2	Observe the Search Buses button.	Search Buses button should be clearly visible and readable.	
TC-BUS-030 - Click Search Buses with valid search details					
TS-BUS-005	TC-BUS-030	1	Select a valid From location.	From location should be displayed.	
		2	Select a valid To location.	To location should be displayed.	
		3	Select a valid journey date.	Selected date should be displayed.	

		4	Click Search Buses.	Application should respond according to the currently implemented/preview functionality.	
TC-BUS-031 - Click Search Buses without From location					
TS-BUS-005	TC-BUS-031	1	Leave the From field blank.	From field should remain empty.	
		2	Select a valid To location and journey date.	To and date should be populated.	
		3	Click Search Buses.	Application should handle the missing From location appropriately.	
TC-BUS-032 - Click Search Buses without To location					
TS-BUS-005	TC-BUS-032	1	Select a valid From location.	From location should be displayed.	
		2	Leave the To field blank.	To field should remain empty.	
		3	Select a valid journey date.	Date should be displayed.	
		4	Click Search Buses.	Application should handle the missing destination appropriately.	
TC-BUS-033 - Click Search Buses without journey date					
TS-BUS-005	TC-BUS-033	1	Select valid From and To locations.	Locations should be displayed.	
		2	Leave the journey date unselected.	Date field should remain unselected.	
		3	Click Search Buses.	Application should handle the missing date appropriately.	
TC-BUS-034 - Click Search Buses with all fields blank					
TS-BUS-005	TC-BUS-034	1	Open the bus search section.	Search section should be displayed.	
		2	Leave From, To and journey date blank.	All fields should remain empty.	
		3	Click Search Buses.	Application should not proceed with an invalid/incomplete search.	
TC-BUS-035 - Verify repeated Search Buses clicks					
TS-BUS-005	TC-BUS-035	1	Enter/select the required search details.	Search details should be populated.	
		2	Click Search Buses multiple times.	Application should handle repeated clicks appropriately without unexpected behavior or duplicate actions.	
TC-BUS-036 - Verify Search Buses button after refreshing the page					
TS-BUS-005	TC-BUS-036	1	Open the bus search section.	Search section should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Observe the Search Buses button.	Button should remain visible and usable.	
TS-BUS-006 - Verify Bus Search Preview-Only					
TS-BUS-006	TC-BUS-037	1	Open the bus search section.	Bus search section should be displayed.	
		2	Observe the bus search feature.	Preview Only/coming-soon indication should be clearly displayed.	
TC-BUS-038 - Verify preview is understandable					
TS-BUS-006	TC-BUS-038	1	Open the bus search section.	Section should be displayed.	
		2	Read the displayed preview/availability message.	Message should clearly communicate that the feature is not fully available.	

TC-BUS-039 - Verify unavailable bus-search functionality does not falsely indicate completion					
TS-BUS-006	TC-BUS-039		1 Enter valid search details.	Details should be accepted/displayed.	
			2 Attempt to search for buses.	Application should not falsely indicate that a completed bus booking/search has occurred while the feature is in preview.	
TS-BUS-007 - Verify Handling of Invalid Departure Location					
TC-BUS-040 - Enter invalid departure location					
TS-BUS-007	TC-BUS-040		1 Open the bus search section.	Bus search section should be displayed.	
			2 Enter an invalid/unavailable departure location.	Invalid input should not be accepted as a valid location.	
			3 Observe the suggestions/validation.	Appropriate validation or no-match indication should be displayed.	
TC-BUS-041 - Enter random characters in From field					
TS-BUS-007	TC-BUS-041		1 Click the From field.	From field should become active.	
			2 Enter random characters such as @@@###.	Application should handle the input appropriately.	
			3 Observe the suggestions/results.	Invalid input should not be presented as a valid location.	
TC-BUS-042 - Enter numeric value in From field					
TS-BUS-007	TC-BUS-042		1 Click the From field.	From field should become active.	
			2 Enter only numeric characters.	Application should handle the input according to the field validation rules.	
			3 Observe the suggestions/results.	Numeric input should not be incorrectly treated as a valid location.	
TC-BUS-043 - Search using invalid departure location					
TS-BUS-007	TC-BUS-043		1 Enter an invalid departure location.	Invalid value should be entered/handled.	
			2 Enter valid destination and date.	Valid destination and date should be displayed.	
			3 Click Search Buses.	Application should prevent or appropriately handle the invalid departure location.	
TC-BUS-044 - Clear invalid departure input					
TS-BUS-007	TC-BUS-044		1 Enter an invalid value in the From field.	Invalid value should be entered/handled.	
			2 Clear the From field.	From field should become empty.	
			3 Enter a valid departure location.	Valid location should be accepted/displayed.	
TC-BUS-045 - Verify invalid departure location does not replace valid selection					
TS-BUS-007	TC-BUS-045		1 Select a valid departure location.	Valid location should be displayed.	
			2 Attempt to enter an invalid/unavailable location.	Invalid location should not be accepted as a valid selection.	
			3 Observe the From field.	Previously selected valid value should remain or invalid input should be clearly rejected.	
TS-BUS-008 - Verify Handling of Invalid Destination					
TC-BUS-046 - Enter invalid destination					
TS-BUS-008	TC-BUS-046		1 Open the bus search section.	Bus search section should be displayed.	

		2	Enter an invalid/unavailable destination.	Invalid destination should not be accepted as a valid location.	
		3	Observe the suggestions/validation.	Appropriate validation or no-match indication should be displayed.	
TC-BUS-047 - Enter random characters in To field					
TS-BUS-008	TC-BUS-047	1	Click the To field.	To field should become active.	
		2	Enter random characters such as @@@###.	Application should handle the input appropriately.	
		3	Observe the results.	Invalid input should not be presented as a valid destination.	
TC-BUS-048 - Search using invalid destination					
TS-BUS-008	TC-BUS-048	1	Select a valid departure location.	Departure location should be displayed.	
		2	Enter an invalid destination.	Invalid destination should be handled appropriately.	
		3	Select a valid journey date.	Date should be displayed.	
		4	Click Search Buses.	Application should prevent or appropriately handle the invalid destination.	
TC-BUS-049 - Clear invalid destination and enter valid destination					
TS-BUS-008	TC-BUS-049	1	Enter an invalid destination.	Invalid value should be handled.	
		2	Clear the To field.	To field should become empty.	
		3	Enter/select a valid destination.	Valid destination should be accepted and displayed.	
TC-BUS-050 - Verify invalid destination does not replace valid selection					
TS-BUS-008	TC-BUS-050	1	Select a valid destination.	Valid destination should be displayed.	
		2	Attempt to enter an invalid destination.	Invalid destination should not be accepted as a valid selection.	
		3	Observe the To field.	Valid selection should remain or invalid input should be clearly rejected.	
TS-BUS-009 - Verify Handling of Invalid Journey Date					
TC-BUS-051 - Attempt to select a past date					
TS-BUS-009	TC-BUS-051	1	Open the journey date selector.	Date selector should be displayed.	
		2	Select a date before the current date.	Past date should not be accepted if past dates are restricted.	
TC-BUS-052 - Enter invalid date format					
TS-BUS-009	TC-BUS-052	1	Activate the journey date field.	Date field should become active.	
		2	Enter an invalid date format, if manual entry is supported.	Invalid date format should be rejected or validated appropriately.	
TC-BUS-053 - Enter impossible calendar date					
TS-BUS-009	TC-BUS-053	1	Activate the journey date field, if manual entry is supported.	Date field should become active.	
		2	Enter an impossible date such as 31/02.	Invalid calendar date should not be accepted.	
TC-BUS-054 - Verify valid date after invalid date attempt					
TS-BUS-009	TC-BUS-054	1	Attempt to select/enter an invalid date.	Invalid date should be rejected or validated.	

		2	Select a valid available future date.	Valid date should be accepted and displayed correctly.	
TC-BUS-055 - Search using invalid date					
TS-BUS-009	TC-BUS-055	1	Select valid From and To locations.	Locations should be displayed.	
		2	Attempt to use an invalid/unavailable journey date.	Invalid date should be rejected or handled appropriately.	
		3	Click Search Buses.	Application should not proceed with an invalid journey date.	
TS-ROUTE-001 - Verify Popular Routes					
TC-ROUTE-001 - Verify Popular Routes section is displayed					
TS-ROUTE-001	TC-ROUTE-001	1	Open the Tripva website.	Home page should be displayed.	
		2	Navigate to the Popular Routes section.	Popular Routes section should be displayed.	
		3	Observe the section.	Available routes should be displayed correctly.	
TC-ROUTE-002 - Verify route names are displayed					
TS-ROUTE-001	TC-ROUTE-002	1	Open the Popular Routes section.	Section should be displayed.	
		2	Observe the listed routes.	Route names should be clearly visible and readable.	
TC-ROUTE-003 - Verify route cards/details are displayed correctly					
TS-ROUTE-001	TC-ROUTE-003	1	Open the Popular Routes section.	Section should be displayed.	
		2	Observe each route card.	Route information and associated UI elements should be displayed correctly without overlap.	
TC-ROUTE-004 - Verify route selection					
TS-ROUTE-001	TC-ROUTE-004	1	Open the Popular Routes section.	Section should be displayed.	
		2	Select a route that provides a clickable action.	Route should respond to the click.	
		3	Observe the result.	Corresponding page/section or action should be displayed.	
TC-ROUTE-005 - Verify all displayed routes are accessible					
TS-ROUTE-001	TC-ROUTE-005	1	Open the Popular Routes section.	Section should be displayed.	
		2	Select each available clickable route one by one.	Each route should respond correctly.	
		3	Observe each destination/action.	No broken or unexpected destination should occur.	
TC-ROUTE-006 - Verify Popular Routes after page refresh					
TS-ROUTE-001	TC-ROUTE-006	1	Open the Popular Routes section.	Section should be displayed.	
		2	Refresh the browser.	Page should reload successfully.	
		3	Navigate back to Popular Routes.	Section and route information should remain available.	
TS-ROUTE-002 - Verify Route Navigation					
TC-ROUTE-007 - Verify route opens correct destination					
TS-ROUTE-002	TC-ROUTE-007	1	Open Popular Routes.	Section should be displayed.	

		2	Click an available route.	Route should be selected.	
		3	Verify the destination.	Correct corresponding destination should be displayed.	
TC-ROUTE-008 - Verify browser Back after route navigation					
TS-ROUTE-002	TC-ROUTE-008	1	Open a route from Popular Routes.	Route destination should open.	
		2	Click browser Back.	Previous Tripva page should be restored correctly.	
TC-ROUTE-009 - Verify route navigation does not produce broken page					
TS-ROUTE-002	TC-ROUTE-009	1	Open Popular Routes.	Section should be displayed.	
		2	Open each available route link.	Route destination should load.	
		3	Observe the destination.	No broken-page or unexpected error should be displayed.	
TS-ROUTE-003 - Verify Popular Routes UI					
TC-ROUTE-010 - Verify route cards alignment					
TS-ROUTE-003	TC-ROUTE-010	1	Open Popular Routes.	Section should be displayed.	
		2	Observe all route cards.	Cards should be properly aligned with consistent spacing.	
TC-ROUTE-011 - Verify route text readability					
TS-ROUTE-003	TC-ROUTE-011	1	Open Popular Routes.	Section should be displayed.	
		2	Observe route names and details.	Text should be readable and should not overlap or be truncated unexpectedly.	
TC-ROUTE-012 - Verify route images/icons, if available					
TS-ROUTE-003	TC-ROUTE-012	1	Open Popular Routes.	Section should be displayed.	
		2	Observe images/icons associated with routes.	Images/icons should load correctly and remain properly aligned.	
TS-NOTIFY-001 - Verify Notify Feature					
TC-NOTIFY-001 - Verify Notify link is displayed					
TS-NOTIFY-001	TC-NOTIFY-001	1	Open the Tripva website.	Home page should be displayed.	
		2	Locate the Notify option/link.	Notify option should be displayed clearly.	
		3	Observe its label and appearance.	Notify option should be readable and properly aligned.	
TC-NOTIFY-002 - Verify Notify link is clickable					
TS-NOTIFY-001	TC-NOTIFY-002	1	Open the Tripva website.	Home page should be displayed.	
		2	Click the Notify link.	Notify functionality/page should respond to the click.	
		3	Observe the result.	Corresponding Notify interface or action should be displayed.	
TC-NOTIFY-003 - Verify Notify interface					
TS-NOTIFY-001	TC-NOTIFY-003	1	Click the Notify link.	Notify interface should open.	
		2	Observe the displayed fields and controls.	Required Notify elements should be displayed correctly.	

		3	Verify the interface layout.	Elements should be properly aligned without overlap.	
TC-NOTIFY-004 - Verify Notify without entering required information					
TS-NOTIFY-001	TC-NOTIFY-004	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Leave the required fields blank.	Fields should remain empty.	
		3	Attempt to submit/continue.	Application should validate the missing required information appropriately.	
TC-NOTIFY-005 - Verify valid information in Notify form					
TS-NOTIFY-001	TC-NOTIFY-005	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Enter valid information in the required fields.	Valid information should be accepted.	
		3	Submit the Notify request, if submission is available.	Application should process the request according to the implemented functionality.	
TC-NOTIFY-006 - Verify invalid email in Notify form					
TS-NOTIFY-001	TC-NOTIFY-006	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Enter an invalid email address, if an email field is provided.	Invalid email should be identified by validation.	
		3	Attempt to submit.	Request should not be accepted until a valid email is provided.	
TC-NOTIFY-007 - Verify Notify interface after refresh					
TS-NOTIFY-001	TC-NOTIFY-007	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Open Notify again.	Notify interface should remain accessible and display correctly.	
TC-NOTIFY-008 - Verify closing Notify interface					
TS-NOTIFY-001	TC-NOTIFY-008	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Click the available Close/Cancel option.	Notify interface should close.	
		3	Observe the page.	Previous page/section should be displayed without UI overlap.	
TS-NOTIFY-002 - Verify Notify Form Validation					
TC-NOTIFY-009					
TS-NOTIFY-002	TC-NOTIFY-009	1	Leave all required fields blank.	Fields should remain empty.	
		2	Click the Submit/Notify button.	Appropriate validation should be displayed.	
		3	Observe the form.	Request should not be submitted with missing required information.	
TC-NOTIFY-010					
TS-NOTIFY-002	TC-NOTIFY-010	1	Enter valid information in all required fields.	Entered values should be accepted.	
		2	Click the Submit/Notify button.	Request should be processed according to the implemented functionality.	
		3	Observe the response.	Appropriate confirmation/response should be displayed.	
TC-NOTIFY-011					

TS-NOTIFY-002	TC-NOTIFY-011	1	Leave one required field blank and enter valid information in the re	Entered values should be accepted.	
		2	Click the Submit/Notify button.	Submission should be prevented.	
		3	Observe the blank field.	Appropriate validation should be displayed.	
TC-NOTIFY-012					
TS-NOTIFY-002	TC-NOTIFY-012	1	Enter an invalid email address in the email field.	Invalid email should be identified.	
		2	Enter valid information in the remaining required fields.	Other values should be accepted.	
		3	Click the Submit/Notify button.	Form should not be submitted with an invalid email.	
TC-NOTIFY-013					
TS-NOTIFY-002	TC-NOTIFY-013	1	Enter an email address without @.	Invalid email should be identified.	
		2	Click the Submit/Notify button.	Submission should be prevented.	
TC-NOTIFY-014					
TS-NOTIFY-002	TC-NOTIFY-014	1	Enter an email address without a valid domain.	Invalid email should be identified.	
		2	Click the Submit/Notify button.	Submission should be prevented.	
TC-NOTIFY-015					
TS-NOTIFY-002	TC-NOTIFY-015	1	Enter a valid email with leading/trailing spaces.	Application should handle the spaces appropriately.	
		2	Click the Submit/Notify button.	Valid information should be processed correctly if spaces are trimmed.	
TC-NOTIFY-016					
TS-NOTIFY-002	TC-NOTIFY-016	1	Enter only spaces in a required field.	Input should be treated as empty/invalid.	
		2	Click the Submit/Notify button.	Submission should be prevented and validation displayed.	
TC-NOTIFY-017					
TS-NOTIFY-002	TC-NOTIFY-017	1	Enter invalid information.	Validation should be displayed.	
		2	Replace the invalid information with valid information.	Valid information should be accepted.	
		3	Click the Submit/Notify button.	Request should be processed according to the implemented functionality.	
TC-NOTIFY-018					
TS-NOTIFY-002	TC-NOTIFY-018	1	Enter valid information in the fields.	Values should be displayed.	
		2	Leave one required field invalid/blank.	Validation should be displayed.	
		3	Observe the remaining fields.	Previously entered valid values should remain available where applicable.	
TC-NOTIFY-019					
TS-NOTIFY-002	TC-NOTIFY-019	1	Enter invalid values in multiple fields.	Invalid values should be identified.	
		2	Click the Submit/Notify button.	Submission should be prevented.	
		3	Observe the validation messages.	Appropriate validation should be displayed for the affected fields.	

TC-NOTIFY-020					
TS-NOTIFY-002	TC-NOTIFY-020	1	Enter information in the Notify form.	Values should be displayed.	
		2	Clear all entered information.	All fields should become empty.	
		3	Click the Submit/Notify button.	Required-field validation should be triggered.	
TS-NOTIFY-002 - Verify Notify Form Validation					
TC-NOTIFY-021					
TS-NOTIFY-002	TC-NOTIFY-021	1	Enter a valid email address in the Notify form.	Email should be accepted.	
		2	Modify the email by removing one character.	Modified value should be reflected correctly.	
		3	Submit the form.	Application should validate the modified email appropriately.	
TC-NOTIFY-022					
TS-NOTIFY-002	TC-NOTIFY-022	1	Enter an email containing numbers.	Application should accept it if it is a valid email format.	
		2	Submit the form.	Request should be processed according to the implemented functionality.	
TC-NOTIFY-023					
TS-NOTIFY-002	TC-NOTIFY-023	1	Enter an email containing unsupported special characters.	Application should validate the email appropriately.	
		2	Submit the form.	Invalid email should not be accepted.	
TC-NOTIFY-024					
TS-NOTIFY-002	TC-NOTIFY-024	1	Enter an email containing multiple @ symbols.	Email should be identified as invalid.	
		2	Submit the form.	Submission should be prevented.	
TC-NOTIFY-025					
TS-NOTIFY-002	TC-NOTIFY-025	1	Enter an email with a missing username.	Email should be identified as invalid.	
		2	Submit the form.	Submission should be prevented.	
TC-NOTIFY-026					
TS-NOTIFY-002	TC-NOTIFY-026	1	Enter an email with a missing domain extension.	Email should be validated appropriately.	
		2	Submit the form.	Invalid email should not be accepted.	
TC-NOTIFY-027					
TS-NOTIFY-002	TC-NOTIFY-027	1	Enter a very long email address within the allowed input length.	Application should handle the input without UI issues.	
		2	Submit the form.	Application should process or validate the value according to its rules.	
TC-NOTIFY-028					
TS-NOTIFY-002	TC-NOTIFY-028	1	Enter text containing HTML/script-like characters in an input field.	Application should safely handle the input without executing it.	

		2	Submit the form.	Input should be safely validated/handled.	
TC-NOTIFY-029					
TS-NOTIFY-002	TC-NOTIFY-029	1	Enter valid information.	Values should be displayed correctly.	
		2	Navigate away from the Notify form without submitting.	User should be able to leave the form normally.	
		3	Return to the Notify form.	Form should load according to the application's implemented behavior.	
TC-NOTIFY-030					
TS-NOTIFY-002	TC-NOTIFY-030	1	Open the Notify form.	Notify form should be displayed.	
		2	Enter valid information and submit multiple times.	Application should handle repeated submissions appropriately without unintended duplicate processing.	
TS-NOTIFY-003 - Verify Notify Feature Navigation					
TC-NOTIFY-031					
TS-NOTIFY-003	TC-NOTIFY-031	1	Click the Notify link.	Notify interface should open.	
		2	Click the available Back/Close option.	User should return to the previous page/section.	
TC-NOTIFY-032					
TS-NOTIFY-003	TC-NOTIFY-032	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Use the browser Back button.	Previous page should be displayed correctly.	
		3	Use the browser Forward button.	Notify interface/page should be restored correctly if supported by browser history.	
TC-NOTIFY-033					
TS-NOTIFY-003	TC-NOTIFY-033	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Observe the interface.	Notify interface should remain accessible without broken UI.	
TC-NOTIFY-034					
TS-NOTIFY-003	TC-NOTIFY-034	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Scroll through the interface/page.	Page should scroll correctly without overlapping elements.	
		3	Observe the Notify controls.	Controls should remain accessible and properly displayed.	
TC-NOTIFY-035					
TS-NOTIFY-003	TC-NOTIFY-035	1	Open the Notify interface.	Notify interface should be displayed.	
		2	Open another available navigation option.	Selected destination should open correctly.	
		3	Return to Notify.	Notify feature should remain accessible.	
TS-ACCOUNT-001 - Verify Account/Login Functionality					
TC-ACCOUNT-001					
TS-ACCOUNT-001	TC-ACCOUNT-001	1	Open the Account/Login option.	Account/Login interface should be displayed.	

		2	Observe the available input fields and controls.	Required fields and controls should be displayed correctly.	
		3	Verify the layout.	All elements should be properly aligned and readable.	
TC-ACCOUNT-002					
TS-ACCOUNT-001	TC-ACCOUNT-002	1	Leave the username/email field blank.	Field should remain empty.	
		2	Enter valid information in the remaining required fields.	Entered information should be accepted.	
		3	Click Login/Submit.	Appropriate validation should be displayed for the blank field.	
TC-ACCOUNT-003					
TS-ACCOUNT-001	TC-ACCOUNT-003	1	Leave the password field blank.	Password field should remain empty.	
		2	Enter valid username/email.	Username/email should be accepted.	
		3	Click Login/Submit.	Appropriate validation should be displayed for the blank password.	
TC-ACCOUNT-004					
TS-ACCOUNT-001	TC-ACCOUNT-004	1	Enter invalid login credentials.	Invalid credentials should be entered.	
		2	Click Login/Submit.	Login should not be completed with invalid credentials.	
		3	Observe the response.	Appropriate error/validation message should be displayed.	
TC-ACCOUNT-005					
TS-ACCOUNT-001	TC-ACCOUNT-005	1	Enter valid login credentials.	Credentials should be accepted.	
		2	Click Login/Submit.	Application should process the login request.	
		3	Observe the result.	User should be redirected to the appropriate page if authentication is implemented.	
TC-ACCOUNT-006					
TS-ACCOUNT-001	TC-ACCOUNT-006	1	Enter an invalid email format.	Invalid email format should be identified.	
		2	Enter a password.	Password should be accepted according to field rules.	
		3	Click Login/Submit.	Login should not proceed with invalid email format.	
TC-ACCOUNT-007					
TS-ACCOUNT-001	TC-ACCOUNT-007	1	Enter valid credentials.	Values should be displayed/accepted.	
		2	Refresh the page before submitting.	Page should reload successfully.	
		3	Observe the login form.	Form should load correctly according to the application's behavior.	
TC-ACCOUNT-008					
TS-ACCOUNT-001	TC-ACCOUNT-008	1	Enter a password.	Password should be accepted.	
		2	Observe the password field.	Password should be masked if the field is designed as a password field.	
		3	Click the password visibility control, if available.	Password visibility should change appropriately.	
TC-ACCOUNT-009					

TS-ACCOUNT-001	TC-ACCOUNT-009	1	Enter spaces in the username/email field.	Input should be validated appropriately.	
		2	Click Login/Submit.	Invalid/blank input should not be accepted.	
TC-ACCOUNT-010					
TS-ACCOUNT-001	TC-ACCOUNT-010	1	Enter valid information.	Information should be accepted.	
		2	Clear the entered information.	Fields should become empty.	
		3	Attempt to submit.	Appropriate required-field validation should be displayed.	
TS-ACCOUNT-002 - Verify Account Navigation					
TC-ACCOUNT-011					
TS-ACCOUNT-002	TC-ACCOUNT-011	1	Open the Account/Login option.	Account/Login interface should be displayed.	
		2	Click the available Register/Sign Up option.	Registration interface should be displayed.	
		3	Observe the page.	Registration page should load without errors.	
TC-ACCOUNT-012					
TS-ACCOUNT-002	TC-ACCOUNT-012	1	Open the Account/Login interface.	Interface should be displayed.	
		2	Click the Forgot Password option, if available.	Password recovery interface should be displayed.	
		3	Observe the page.	Appropriate recovery fields/instructions should be displayed.	
TC-ACCOUNT-013					
TS-ACCOUNT-002	TC-ACCOUNT-013	1	Open the Account/Login interface.	Interface should be displayed.	
		2	Click the available Home option/logo.	Home page should be displayed.	
		3	Observe the page.	User should be returned to the Tripva home page.	
TC-ACCOUNT-014					
TS-ACCOUNT-002	TC-ACCOUNT-014	1	Open the Account/Login interface.	Interface should be displayed.	
		2	Use the browser Back button.	Previous page should be displayed correctly.	
		3	Use the browser Forward button.	Account/Login page should be restored correctly if available in browser history.	
TC-ACCOUNT-015					
TS-ACCOUNT-002	TC-ACCOUNT-015	1	Open the Account/Login interface.	Interface should be displayed.	
		2	Refresh the browser.	Page should reload successfully.	
		3	Observe the Account/Login interface.	Interface should load correctly without broken elements.	
TC-ACCOUNT-016					
TS-ACCOUNT-002	TC-ACCOUNT-016	1	Open the Account/Login interface.	Interface should be displayed.	
		2	Use the available navigation links one by one.	Each link should respond correctly.	
		3	Observe each destination.	Correct corresponding page/section should be displayed.	
TS-ACCOUNT-003 - Verify Account UI and Input Fields					

TC-ACCOUNT-017					
TS-ACCOUNT-003	TC-ACCOUNT-017		1 Open the Account/Login interface.	Interface should be displayed.	
			2 Observe all input fields.	All required fields should be clearly labelled.	
			3 Observe buttons and links.	Controls should be visible, readable and properly aligned.	
TC-ACCOUNT-018					
TS-ACCOUNT-003	TC-ACCOUNT-018		1 Click inside the username/email field.	Cursor should appear in the field.	
			2 Enter valid text.	Text should be entered correctly.	
			3 Remove the entered text.	Field should become empty.	
TC-ACCOUNT-019					
TS-ACCOUNT-003	TC-ACCOUNT-019		1 Click inside the password field.	Cursor should appear in the field.	
			2 Enter a password.	Password should be entered correctly.	
			3 Observe the entered value.	Password should be masked where applicable.	
TC-ACCOUNT-020					
TS-ACCOUNT-003	TC-ACCOUNT-020		1 Resize the browser window.	Page should respond to the changed window size.	
			2 Observe the Account/Login interface.	Fields and controls should remain usable without inappropriate overlap.	
TC-ACCOUNT-021					
TS-ACCOUNT-003	TC-ACCOUNT-021		1 Open the Account/Login interface on a different supported browser.	Page should load successfully.	
			2 Observe the fields and controls.	Account/Login elements should display and function consistently.	
TC-ACCOUNT-022					
TS-ACCOUNT-003	TC-ACCOUNT-022		1 Enter a long value in the username/email field.	Application should handle the input according to the field's allowed length.	
			2 Observe the interface.	Text should not cause layout distortion or overlap.	
TC-ACCOUNT-023					
TS-ACCOUNT-003	TC-ACCOUNT-023		1 Enter a long value in the password field.	Application should handle the input according to its password rules.	
			2 Observe the field.	UI should remain properly aligned and usable.	
TS-ACCOUNT-004 - Verify Account Field Validation					
TC-ACCOUNT-024					
TS-ACCOUNT-004	TC-ACCOUNT-024		1 Enter an email address containing uppercase letters.	Email should be accepted according to application rules.	
			2 Submit the form.	Application should process the input appropriately.	
TC-ACCOUNT-025					
TS-ACCOUNT-004	TC-ACCOUNT-025		1 Enter an email address containing numbers.	Valid email format should be accepted.	

		2	Submit the form.	Application should process the input appropriately.	
TC-ACCOUNT-026					
TS-ACCOUNT-004	TC-ACCOUNT-026	1	Enter an email without @.	Invalid email should be identified.	
		2	Submit the form.	Submission should be prevented.	
TC-ACCOUNT-027					
TS-ACCOUNT-004	TC-ACCOUNT-027	1	Enter an email without a domain.	Invalid email should be identified.	
		2	Submit the form.	Submission should be prevented.	
TC-ACCOUNT-028					
TS-ACCOUNT-004	TC-ACCOUNT-028	1	Enter an email containing spaces within the address.	Invalid email should be identified.	
		2	Submit the form.	Submission should be prevented.	
TC-ACCOUNT-029					
TS-ACCOUNT-004	TC-ACCOUNT-029	1	Enter only spaces in the username/email field.	Input should be treated as invalid/empty.	
		2	Submit the form.	Appropriate validation should be displayed.	
TC-ACCOUNT-030					
TS-ACCOUNT-004	TC-ACCOUNT-030	1	Enter only spaces in the password field.	Input should be treated as invalid/empty.	
		2	Submit the form.	Appropriate validation should be displayed.	
TC-ACCOUNT-031					
TS-ACCOUNT-004	TC-ACCOUNT-031	1	Enter special characters in the username/email field.	Application should validate the input according to its rules.	
		2	Submit the form.	Invalid input should not be accepted where applicable.	
TC-ACCOUNT-032					
TS-ACCOUNT-004	TC-ACCOUNT-032	1	Enter a password containing letters, numbers and special characters.	Password should be accepted if it satisfies the application's rules.	
		2	Submit the form.	Application should process the credentials appropriately.	
TC-ACCOUNT-033					
TS-ACCOUNT-004	TC-ACCOUNT-033	1	Enter a password shorter than the minimum allowed length, if a message is displayed.	Password should be identified as invalid.	
		2	Submit the form.	Submission should be prevented and appropriate validation displayed.	
TC-ACCOUNT-034					
TS-ACCOUNT-004	TC-ACCOUNT-034	1	Enter a password longer than the maximum allowed length, if a message is displayed.	Application should enforce the defined length restriction.	
		2	Submit the form.	Input should be handled according to the application's validation rules.	

TC-ACCOUNT-035					
TS-ACCOUNT-004	TC-ACCOUNT-035		1 Enter valid username/email and invalid password.	Credentials should be accepted as input.	
			2 Submit the form.	Login should not be completed.	
			3 Observe the response.	Appropriate authentication error should be displayed.	
TC-ACCOUNT-036					
TS-ACCOUNT-004	TC-ACCOUNT-036		1 Enter invalid username/email and valid password.	Values should be accepted as input.	
			2 Submit the form.	Login should not be completed.	
			3 Observe the response.	Appropriate authentication error should be displayed.	
TC-ACCOUNT-037					
TS-ACCOUNT-004	TC-ACCOUNT-037		1 Enter invalid username/email and invalid password.	Invalid values should be entered.	
			2 Submit the form.	Login should not be completed.	
			3 Observe the response.	Appropriate error/validation should be displayed.	
TC-ACCOUNT-038					
TS-ACCOUNT-004	TC-ACCOUNT-038		1 Enter valid credentials.	Credentials should be accepted.	
			2 Submit the form repeatedly.	Application should handle repeated login attempts appropriately without unexpected behavior.	
TC-ACCOUNT-039					
TS-ACCOUNT-004	TC-ACCOUNT-039		1 Enter a script-like value in an input field.	Input should be treated as text and safely handled.	
			2 Submit the form.	Script should not execute through the input field.	
TS-ACCOUNT-005 - Verify Login Button Behavior					
TC-ACCOUNT-040					
TS-ACCOUNT-005	TC-ACCOUNT-040		1 Leave username/email and password fields blank.	Fields should remain empty.	
			2 Observe the Login button.	Login button should be visible and accessible.	
			3 Click the Login button.	Appropriate validation should be displayed.	
TC-ACCOUNT-041					
TS-ACCOUNT-005	TC-ACCOUNT-041		1 Enter valid username/email.	Username/email should be accepted.	
			2 Leave password blank.	Password field should remain empty.	
			3 Click Login.	Login should not proceed and password validation should be displayed.	
TC-ACCOUNT-042					
TS-ACCOUNT-005	TC-ACCOUNT-042		1 Leave username/email blank.	Username/email field should remain empty.	
			2 Enter a valid password.	Password should be accepted.	
			3 Click Login.	Login should not proceed and username/email validation should be displayed.	

TC-ACCOUNT-043					
TS-ACCOUNT-005	TC-ACCOUNT-043	1	Enter valid username/email and password.	Both values should be accepted.	
		2	Click Login once.	Login request should be initiated once.	
		3	Observe the result.	Appropriate page or response should be displayed.	
TC-ACCOUNT-044					
TS-ACCOUNT-005	TC-ACCOUNT-044	1	Enter valid credentials.	Credentials should be accepted.	
		2	Press Enter from the password field.	Login should be triggered if Enter-key submission is supported.	
TC-ACCOUNT-045					
TS-ACCOUNT-005	TC-ACCOUNT-045	1	Enter invalid credentials.	Credentials should be entered.	
		2	Click Login.	Login should fail appropriately.	
		3	Observe the Login button and form.	Form should remain usable for another attempt.	
TC-ACCOUNT-046					
TS-ACCOUNT-005	TC-ACCOUNT-046	1	Enter invalid credentials and submit.	Appropriate validation/error should be displayed.	
		2	Correct the credentials.	Corrected values should be accepted.	
		3	Click Login again.	Application should process the corrected credentials.	
TC-ACCOUNT-047					
TS-ACCOUNT-005	TC-ACCOUNT-047	1	Enter valid credentials.	Credentials should be accepted.	
		2	Click Login multiple times rapidly.	Application should handle multiple clicks appropriately without unexpected duplicate processing.	
TC-ACCOUNT-048					
TS-ACCOUNT-005	TC-ACCOUNT-048	1	Enter valid username/email.	Username/email should be displayed correctly.	
		2	Enter password.	Password should be masked where applicable.	
		3	Clear both fields.	Both fields should become empty.	
		4	Click Login.	Required-field validation should be displayed.	
TC-ACCOUNT-049					
TS-ACCOUNT-005	TC-ACCOUNT-049	1	Open the login form.	Login form should be displayed.	
		2	Enter invalid information.	Invalid information should be entered.	
		3	Refresh the page.	Page should reload successfully.	
		4	Observe the form.	Form should load correctly according to the application's behavior.	
TC-ACCOUNT-050					
TS-ACCOUNT-005	TC-ACCOUNT-050	1	Open the Account/Login page.	Page should load successfully.	
		2	Click outside the input fields.	Focus should be removed appropriately.	
		3	Return focus to each field.	Each field should remain selectable and usable.	

TS-ACCOUNT-006 - Verify Account Session Behavior					
TC-ACCOUNT-051 - Verify login with valid credentials					
TS-ACCOUNT-006	TC-ACCOUNT-051		1 Enter valid username/email and password.	Credentials should be accepted.	
			2 Click Login.	Login request should be processed.	
			3 Observe the account page.	User should be taken to the appropriate authenticated page if login is implemented.	
TC-ACCOUNT-052 - Verify session after successful login					
TS-ACCOUNT-006	TC-ACCOUNT-052		1 Login using valid credentials.	Login should be successful.	
			2 Navigate to another available page.	Selected page should open.	
			3 Return to the account-related page.	User session should be maintained according to the application behavior.	
TC-ACCOUNT-053 - Verify logout option					
TS-ACCOUNT-006	TC-ACCOUNT-053		1 Login with valid credentials.	User should be authenticated if functionality is implemented.	
			2 Locate the Logout option.	Logout option should be available where applicable.	
			3 Click Logout.	User should be logged out successfully.	
TC-ACCOUNT-054 - Verify access after logout					
TS-ACCOUNT-006	TC-ACCOUNT-054		1 Login successfully.	User should be authenticated.	
			2 Logout from the account.	User should be logged out.	
			3 Try to access an authenticated page using browser navigation.	Application should handle unauthenticated access according to its security rules.	
TC-ACCOUNT-055 - Verify session after browser refresh					
TS-ACCOUNT-006	TC-ACCOUNT-055		1 Login successfully.	User should be authenticated.	
			2 Refresh the browser.	Page should reload successfully.	
			3 Observe the account/session state.	Session should behave according to the application's authentication design.	
TC-ACCOUNT-056 - Verify logout using browser Back button					
TS-ACCOUNT-006	TC-ACCOUNT-056		1 Login successfully.	User should be authenticated.	
			2 Logout.	User should be logged out.	
			3 Click browser Back.	Previously authenticated content should not be improperly accessible after logout.	
TC-ACCOUNT-057 - Verify multiple login and logout cycles					
TS-ACCOUNT-006	TC-ACCOUNT-057		1 Login with valid credentials.	Login should be processed successfully.	
			2 Logout from the account.	User should be logged out.	
			3 Repeat login and logout several times.	Application should handle repeated login/logout cycles without unexpected behavior.	
TC-ACCOUNT-058 - Verify session timeout, if implemented					
TS-ACCOUNT-006	TC-ACCOUNT-058		1 Login successfully.	User should be authenticated.	

		2	Remain inactive for the configured session timeout period.	Session should expire according to the application's security configuration.	
		3	Attempt to access an authenticated feature.	User should be asked to authenticate again if the session has expired.	
TC-ACCOUNT-059 - Verify unauthorized direct access					
TS-ACCOUNT-006	TC-ACCOUNT-059	1	Log out from the account.	User should be logged out.	
		2	Attempt to directly access a protected/account page.	Application should restrict unauthorized access where applicable.	
		3	Observe the response.	Appropriate login/access-denied behavior should be displayed.	
TC-ACCOUNT-060 - Verify login after logout					
TS-ACCOUNT-006	TC-ACCOUNT-060	1	Login with valid credentials.	User should be authenticated.	
		2	Logout.	User should be logged out.	
		3	Login again using valid credentials.	User should be able to log in again successfully.	
TS-ACCOUNT-007 - Verify Login Error Handling					
TC-ACCOUNT-061 - Verify error message for incorrect username					
TS-ACCOUNT-007	TC-ACCOUNT-061	1	Enter an incorrect username/email and valid password.	Entered values should be accepted.	
		2	Click Login.	Login should not be successful.	
		3	Observe the response.	Appropriate error message should be displayed.	
TC-ACCOUNT-062 - Verify error message for incorrect password					
TS-ACCOUNT-007	TC-ACCOUNT-062	1	Enter valid username/email and incorrect password.	Entered values should be accepted.	
		2	Click Login.	Login should not be successful.	
		3	Observe the response.	Appropriate error message should be displayed.	
TC-ACCOUNT-063 - Verify error message for both incorrect credentials					
TS-ACCOUNT-007	TC-ACCOUNT-063	1	Enter incorrect username/email and incorrect password.	Values should be accepted as input.	
		2	Click Login.	Login should fail.	
		3	Observe the response.	Appropriate authentication error should be displayed.	
TC-ACCOUNT-064 - Verify error message disappears after correcting input					
TS-ACCOUNT-007	TC-ACCOUNT-064	1	Enter invalid credentials and click Login.	Error message should be displayed.	
		2	Correct the invalid credentials.	Corrected values should be accepted.	
		3	Submit the form again.	Error should be cleared/updated according to the result.	
TC-ACCOUNT-065 - Verify login form after an unsuccessful login attempt					
TS-ACCOUNT-007	TC-ACCOUNT-065	1	Enter invalid credentials.	Credentials should be entered.	
		2	Click Login.	Login should fail appropriately.	
		3	Observe the login form.	Form should remain available for another login attempt.	
TC-ACCOUNT-066 - Verify multiple consecutive invalid login attempts					

TS-ACCOUNT-007	TC-ACCOUNT-066	1	Enter invalid credentials and submit.	Login should fail.	
		2	Repeat the invalid login attempt several times.	Application should handle repeated attempts appropriately.	
		3	Observe the response.	Appropriate security/error behavior should be displayed if implemented.	
TC-ACCOUNT-067 - Verify login using credentials with leading/trailing spaces					
TS-ACCOUNT-007	TC-ACCOUNT-067	1	Enter valid username/email with leading/trailing spaces.	Application should handle spaces according to its validation rules.	
		2	Enter valid password.	Password should be accepted.	
		3	Click Login.	Login should behave according to the application's input-handling rules.	
TC-ACCOUNT-068 - Verify login after clearing an error message					
TS-ACCOUNT-007	TC-ACCOUNT-068	1	Enter invalid credentials and submit.	Error should be displayed.	
		2	Clear the entered credentials.	Input fields should become empty.	
		3	Enter valid credentials and submit.	Application should process the new login attempt correctly.	
TC-ACCOUNT-069 - Verify login page remains responsive after validation error					
TS-ACCOUNT-007	TC-ACCOUNT-069	1	Enter invalid credentials.	Credentials should be entered.	
		2	Click Login.	Validation/error should be displayed.	
		3	Interact with the input fields again.	Fields and controls should remain functional.	
TC-ACCOUNT-070 - Verify login error handling after page refresh					
TS-ACCOUNT-007	TC-ACCOUNT-070	1	Enter invalid credentials and submit.	Error/validation should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Observe the previous error state.	Page should behave according to the application's refresh behavior without broken UI.	
TS-BUS-001 - Verify Bus Search Functionality					
TC-BUS-001 - Search buses with valid From and To cities					
TS-BUS-001	TC-BUS-001	1	Enter a valid city in the From City field.	From City should accept the entered city.	
		2	Enter a valid city in the To City field.	To City should accept the entered city.	
		3	Select/enter a valid journey date.	Selected date should be displayed.	
		4	Click Search Buses.	Search request should be initiated.	
TC-BUS-002 - Search buses with only From City entered					
TS-BUS-001	TC-BUS-002	1	Enter a valid From City.	From City should be accepted.	
		2	Leave To City blank.	To City should remain empty.	
		3	Enter a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Appropriate validation should be displayed for the missing To City.	
TC-BUS-003 - Search buses with only To City entered					
TS-BUS-001	TC-BUS-003	1	Leave From City blank.	From City should remain empty.	

		2	Enter a valid To City.	To City should be accepted.	
		3	Enter a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Appropriate validation should be displayed for the missing From City.	
TC-BUS-004 - Search buses without entering any details					
TS-BUS-001	TC-BUS-004	1	Leave From City blank.	Field should remain empty.	
		2	Leave To City blank.	Field should remain empty.	
		3	Leave Journey Date blank.	Date should remain empty.	
		4	Click Search Buses.	Appropriate validation should be displayed and search should not proceed.	
TC-BUS-005 - Search buses without selecting journey date					
TS-BUS-001	TC-BUS-005	1	Enter a valid From City.	From City should be accepted.	
		2	Enter a valid To City.	To City should be accepted.	
		3	Leave Journey Date blank.	Date should remain empty.	
		4	Click Search Buses.	Appropriate validation should be displayed for the missing date.	
TC-BUS-006 - Enter same city in From and To fields					
TS-BUS-001	TC-BUS-006	1	Enter the same valid city in From City.	From City should be accepted.	
		2	Enter the same city in To City.	To City should be accepted or appropriately validated.	
		3	Select a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Application should handle same-source-and-destination input according to its business rules.	
TC-BUS-007 - Enter invalid city in From City					
TS-BUS-001	TC-BUS-007	1	Enter an invalid/non-supported city in From City.	Application should validate the entered city.	
		2	Enter a valid To City.	To City should be accepted.	
		3	Select a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Invalid city should not result in an invalid search.	
TC-BUS-008 - Enter invalid city in To City					
TS-BUS-001	TC-BUS-008	1	Enter a valid From City.	From City should be accepted.	
		2	Enter an invalid/non-supported city in To City.	Application should validate the entered city.	
		3	Select a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Invalid destination should be handled appropriately.	
TC-BUS-009 - Enter special characters in From City					
TS-BUS-001	TC-BUS-009	1	Enter special characters in From City.	Application should validate or reject inappropriate input.	
		2	Enter valid To City and Journey Date.	Valid values should be accepted.	
		3	Click Search Buses.	Invalid input should be handled appropriately.	
TC-BUS-010 - Enter special characters in To City					

TS-BUS-001	TC-BUS-010	1	Enter a valid From City.	From City should be accepted.	
		2	Enter special characters in To City.	Application should validate or reject inappropriate input.	
		3	Select a valid journey date.	Date should be accepted.	
		4	Click Search Buses.	Invalid input should be handled appropriately.	
TS-BUS-001 - Verify Bus Search Functionality					
TC-BUS-011 - Verify past journey date					
TS-BUS-001	TC-BUS-011	1	Enter valid From and To cities.	Cities should be accepted.	
		2	Select a date earlier than the current date.	Past date should be rejected or appropriately validated.	
		3	Click Search Buses.	Search should not proceed with an invalid journey date.	
TC-BUS-012 - Verify current date selection					
TS-BUS-001	TC-BUS-012	1	Enter valid From and To cities.	Cities should be accepted.	
		2	Select the current date as Journey Date.	Current date should be selectable if supported.	
		3	Click Search Buses.	Search should be processed according to availability.	
TC-BUS-013 - Verify future journey date					
TS-BUS-001	TC-BUS-013	1	Enter valid From and To cities.	Cities should be accepted.	
		2	Select a future Journey Date.	Selected date should be displayed correctly.	
		3	Click Search Buses.	Search should be processed for the selected future date.	
TC-BUS-014 - Verify swapping From and To cities					
TS-BUS-001	TC-BUS-014	1	Enter valid From and To cities.	Both cities should be displayed correctly.	
		2	Use the swap option, if available.	From and To cities should be exchanged.	
		3	Observe both fields.	Swapped values should be displayed correctly.	
TC-BUS-015 - Verify clearing From City					
TS-BUS-001	TC-BUS-015	1	Enter a valid From City.	From City should be displayed.	
		2	Clear the From City field.	From City should become empty.	
		3	Enter another valid From City.	New city should be accepted.	
TC-BUS-016 - Verify clearing To City					
TS-BUS-001	TC-BUS-016	1	Enter a valid To City.	To City should be displayed.	
		2	Clear the To City field.	To City should become empty.	
		3	Enter another valid To City.	New city should be accepted.	
TC-BUS-017 - Verify changing selected journey date					
TS-BUS-001	TC-BUS-017	1	Select a valid Journey Date.	Selected date should be displayed.	
		2	Select a different valid date.	Previously selected date should be replaced.	
		3	Observe the date field.	Newly selected date should be displayed correctly.	

TC-BUS-018 - Verify leading and trailing spaces in city names					
TS-BUS-001	TC-BUS-018	1	Enter a valid From City with leading/trailing spaces.	Application should handle spaces appropriately.	
		2	Enter a valid To City.	To City should be accepted.	
		3	Select a valid Journey Date and search.	Search should behave according to the application's input validation rules.	
TC-BUS-019 - Verify bus search after modifying all search inputs					
TS-BUS-001	TC-BUS-019	1	Enter valid From City, To City and Journey Date.	Values should be displayed correctly.	
		2	Change the From City, To City and Journey Date.	New values should replace the previous values.	
		3	Click Search Buses.	Search should use the latest entered values.	
TC-BUS-020 - Verify bus search controls after page refresh					
TS-BUS-001	TC-BUS-020	1	Enter valid search details.	Search details should be displayed.	
		2	Refresh the page.	Page should reload successfully.	
		3	Observe the bus search section.	Search controls should load correctly without UI errors.	
TS-BUS-002 - Verify Bus Search Results					
TC-BUS-021 - Verify search results for valid route					
TS-BUS-002	TC-BUS-021	1	Enter valid From City, To City and Journey Date.	Search details should be accepted.	
		2	Click Search Buses.	Search should be initiated.	
		3	Observe the result.	Relevant bus results or appropriate availability message should be displayed.	
TC-BUS-022 - Verify no-bus-availability result					
TS-BUS-002	TC-BUS-022	1	Enter a valid route and date for which no buses are available.	Search details should be accepted.	
		2	Click Search Buses.	Search should be processed.	
		3	Observe the result.	Appropriate no-availability message should be displayed.	
TC-BUS-023 - Verify search result route information					
TS-BUS-002	TC-BUS-023	1	Perform a valid bus search.	Results should be displayed if available.	
		2	Observe the From and To information.	Displayed route should match the searched route.	
		3	Observe the journey date.	Displayed date should match the selected date.	
TC-BUS-024 - Verify search results after changing route					
TS-BUS-002	TC-BUS-024	1	Perform a bus search with valid details.	Results should be displayed.	
		2	Change the From/To cities.	New route should be accepted.	
		3	Search again.	Results should correspond to the newly selected route.	
TC-BUS-025 - Verify search results after changing journey date					
TS-BUS-002	TC-BUS-025	1	Perform a bus search for a valid date.	Results should be displayed if available.	

		2	Change the Journey Date.	New date should be displayed.	
		3	Search again.	Results should correspond to the newly selected date.	
TC-BUS-026 - Verify search results are not displayed for incomplete search					
TS-BUS-002	TC-BUS-026	1	Leave one mandatory search field empty.	Incomplete search details should remain.	
		2	Click Search Buses.	Validation should be displayed.	
		3	Observe the result section.	Search results should not be displayed for the incomplete request.	
TC-BUS-027 - Verify search result loading behavior					
TS-BUS-002	TC-BUS-027	1	Enter valid search details.	Details should be accepted.	
		2	Click Search Buses.	Search request should start.	
		3	Observe loading behavior.	Appropriate loading indication should be displayed if applicable.	
TC-BUS-028 - Verify search results after repeated searches					
TS-BUS-002	TC-BUS-028	1	Perform a valid bus search.	Results should be displayed.	
		2	Perform another search with different valid details.	New search should be processed.	
		3	Observe the results.	Previous results should be replaced/updated appropriately.	
TC-BUS-029 - Verify result page navigation					
TS-BUS-002	TC-BUS-029	1	Perform a valid bus search.	Results should be displayed if available.	
		2	Navigate to the result/details page, if available.	Corresponding page should open.	
		3	Use browser Back.	Previous search/result page should be restored appropriately.	
TC-BUS-030 - Verify search results after browser refresh					
TS-BUS-002	TC-BUS-030	1	Perform a valid bus search.	Results should be displayed if available.	
		2	Refresh the browser.	Page should reload successfully.	
		3	Observe the result section.	Results/search state should behave according to the application's design without broken UI.	
TS-BUS-003 - Verify Bus Search Result Details					
TC-BUS-031 - Verify bus operator information					
TS-BUS-003	TC-BUS-031	1	Perform a valid bus search.	Relevant results should be displayed.	
		2	Observe the bus operator information.	Operator details should be displayed correctly where available.	
		3	Compare the displayed information with the selected route.	Information should correspond to the searched journey.	
TC-BUS-032 - Verify bus departure time					
TS-BUS-003	TC-BUS-032	1	Perform a valid bus search.	Results should be displayed.	
		2	Observe the departure time.	Departure time should be displayed in a clear and consistent format where available.	
		3	Verify the displayed time.	Time should correspond to the selected journey.	
TC-BUS-033 - Verify bus arrival time					

TS-BUS-003	TC-BUS-033		1 Perform a valid bus search.	Results should be displayed.	
			2 Observe the arrival time.	Arrival time should be displayed correctly where available.	
			3 Verify the displayed time.	Arrival information should correspond to the selected journey.	
TC-BUS-034 - Verify bus fare information					
TS-BUS-003	TC-BUS-034		1 Perform a valid bus search.	Results should be displayed.	
			2 Observe the fare information.	Fare should be displayed correctly where available.	
			3 Verify the displayed fare.	Fare should be associated with the corresponding bus/service.	
TC-BUS-035 - Verify bus availability information					
TS-BUS-003	TC-BUS-035		1 Perform a valid bus search.	Available results should be displayed.	
			2 Observe seat/availability information where provided.	Availability should be displayed clearly.	
			3 Compare availability between displayed services.	Information should correspond to each service.	
TC-BUS-036 - Verify bus result sorting, if available					
TS-BUS-003	TC-BUS-036		1 Perform a valid bus search.	Results should be displayed.	
			2 Use the available sorting option.	Results should be reordered according to the selected option.	
			3 Observe the result list.	Sorting should be applied correctly without losing result information.	
TC-BUS-037 - Verify bus result filtering, if available					
TS-BUS-003	TC-BUS-037		1 Perform a valid bus search.	Results should be displayed.	
			2 Apply an available filter.	Filter should be applied.	
			3 Observe the results.	Only results matching the selected filter should be displayed.	
TC-BUS-038 - Verify clearing applied filters					
TS-BUS-003	TC-BUS-038		1 Perform a valid bus search.	Results should be displayed.	
			2 Apply an available filter.	Filtered results should be displayed.	
			3 Clear the applied filter.	Filter should be removed.	
			4 Observe the results.	Unfiltered results should be restored appropriately.	
TC-BUS-039 - Verify bus result details link					
TS-BUS-003	TC-BUS-039		1 Perform a valid bus search.	Results should be displayed.	
			2 Click an available bus/details option.	Corresponding details should open.	
			3 Observe the details.	Details should belong to the selected bus.	
TC-BUS-040 - Verify bus results on browser back navigation					
TS-BUS-003	TC-BUS-040		1 Perform a valid bus search.	Results should be displayed.	
			2 Open a bus/details page if available.	Details page should open.	
			3 Click browser Back.	Previous search results should be restored appropriately.	

TS-NOTIFY-001 - Verify Early Access / Notify Me					
TC-NOTIFY-001 - Verify Notify Me option navigation					
TS-NOTIFY-001	TC-NOTIFY-001		1 Open Tripva home page.	Home page should load successfully.	
			2 Click Notify Me.	User should be taken to the notification/early-access section.	
			3 Observe the section.	Email field and Notify Me button should be displayed.	
TC-NOTIFY-002 - Verify valid email submission					
TS-NOTIFY-001	TC-NOTIFY-002		1 Enter a valid email address.	Email should be accepted.	
			2 Click Notify Me.	Request should be submitted.	
			3 Observe the response.	Appropriate success/confirmation message should be displayed.	
TC-NOTIFY-003 - Verify submission with blank email					
TS-NOTIFY-001	TC-NOTIFY-003		1 Leave email field blank.	Field should remain empty.	
			2 Click Notify Me.	Submission should be prevented.	
			3 Observe validation.	Appropriate validation should be displayed.	
TC-NOTIFY-004 - Verify invalid email submission					
TS-NOTIFY-001	TC-NOTIFY-004		1 Enter an invalid email format.	Invalid email should be identified.	
			2 Click Notify Me.	Submission should not proceed with invalid input.	
			3 Observe validation.	Appropriate error message should be displayed.	
TC-NOTIFY-005 - Verify duplicate email submission					
TS-NOTIFY-001	TC-NOTIFY-005		1 Submit a valid email successfully.	Email should be processed.	
			2 Submit the same email again.	Duplicate subscription should be handled appropriately.	
			3 Observe the response.	Appropriate message should be displayed.	
TC-NOTIFY-006 - Verify spaces in email field					
TS-NOTIFY-001	TC-NOTIFY-006		1 Enter an email containing leading/trailing spaces.	Application should handle spaces according to validation rules.	
			2 Submit the email.	Application should process or reject it appropriately.	
TS-ROUTES-001 - Verify Popular Routes					
TC-ROUTES-001 - Verify Popular Routes section					
TS-ROUTES-001	TC-ROUTES-001		1 Scroll to Popular Routes.	Popular Routes section should be displayed.	
			2 Observe the route cards.	Available route cards should be displayed correctly.	
			3 Verify route information.	Route names and related information should be readable.	
TC-ROUTES-002 - Verify route card navigation					
TS-ROUTES-001	TC-ROUTES-002		1 Select an available route card/Discover option.	Route interaction should respond correctly.	

		2	Observe the result.	Corresponding route information/page should open if functionality is implemented.	
TC-ROUTES-003 - Verify route fare information					
TS-ROUTES-001	TC-ROUTES-003	1	Observe a Popular Route card.	Route card should be displayed.	
		2	Check starting fare.	Starting fare should be displayed clearly.	
		3	Compare displayed fare with route.	Fare should correspond to the displayed route.	
TC-ROUTES-004 - Verify route distance information					
TC-ROUTES-005 - Verify multiple popular routes					
TS-ROUTES-001	TC-ROUTES-005	1	Open Popular Routes section.	Section should load correctly.	
		2	Observe multiple route cards.	All available route cards should be displayed without overlap or broken elements.	
		3	Scroll through the section.	All route information should remain accessible.	
TS-ROADMAP-001 - Verify Upcoming Features					
TC-ROADMAP-001 - Verify Roadmap section					
TS-ROADMAP-001	TC-ROADMAP-001	1	Navigate to the Roadmap/Upcoming Features section.	Section should be displayed.	
		2	Observe listed features.	Upcoming features should be displayed clearly.	
TC-ROADMAP-002 - Verify Bus Ticket Booking roadmap item					
TS-ROADMAP-001	TC-ROADMAP-002	1	Observe the Bus Ticket Booking roadmap item.	Item should be displayed correctly.	
		2	Verify its .	Current launch should be displayed correctly.	
TC-ROADMAP-003 - Verify Flight Booking roadmap item					
TS-ROADMAP-001	TC-ROADMAP-003	1	Observe Flight Booking.	Feature should be displayed.	
		2	Verify its .	It should be identified as a future release.	
TC-ROADMAP-004 - Verify Hotel Booking roadmap item					
TS-ROADMAP-001	TC-ROADMAP-004	1	Observe Hotel Booking.	Feature should be displayed.	
		2	Verify its .	It should be identified as a future release.	
TC-ROADMAP-005 - Verify Holiday Packages roadmap item					
TS-ROADMAP-001	TC-ROADMAP-005	1	Observe Holiday Packages.	Feature should be displayed.	
		2	Verify its .	It should be identified as a future release.	
TS-NAV-001 - Verify Navigation					
TC-NAV-001 - Verify Home navigation					
TS-NAV-001	TC-NAV-001	1	Click the Tripva logo/Home option.	User should be taken to the home page.	
		2	Observe the page.	Home page should load correctly.	

TC-NAV-002 - Verify Routes navigation					
TS-NAV-001	TC-NAV-002	1	Click Routes.	User should navigate to the Routes section.	
		2	Observe the destination.	Correct section should be displayed.	
TC-NAV-003 - Verify Why Tripva navigation					
TS-NAV-001	TC-NAV-003	1	Click Why Tripva.	User should navigate to the corresponding section.	
		2	Observe the content.	Why Tripva information should be displayed.	
TC-NAV-004 - Verify Roadmap navigation					
TS-NAV-001	TC-NAV-004	1	Click Roadmap.	User should navigate to the Roadmap section.	
		2	Observe the content.	Upcoming features should be displayed.	
TC-NAV-005 - Verify Launch navigation					
TS-NAV-001	TC-NAV-005	1	Click Launch.	User should navigate to the launch/early-access area.	
		2	Observe the section.	Relevant launch information should be displayed.	
TC-NAV-006 - Verify navigation from different page positions					
TS-NAV-001	TC-NAV-006	1	Scroll to different sections of the page.	Page should scroll correctly.	
		2	Use the navigation menu.	Selected section should be reached correctly.	
TS-FOOTER-001 - Verify Footer Links					
TC-FOOTER-001 - Verify Privacy Policy link					
TS-FOOTER-001	TC-FOOTER-001	1	Scroll to the footer.	Footer should be displayed.	
		2	Click Privacy Policy.	Privacy Policy page should open.	
		3	Observe the page.	Correct Privacy Policy content should be displayed.	
TC-FOOTER-002 - Verify Terms & Conditions link					
TS-FOOTER-001	TC-FOOTER-002	1	Scroll to the footer.	Footer should be displayed.	
		2	Click Terms & Conditions.	Terms & Conditions page should open.	
		3	Observe the page.	Correct terms content should be displayed.	
TC-FOOTER-003 - Verify Contact Us link					
TS-FOOTER-001	TC-FOOTER-003	1	Scroll to the footer.	Footer should be displayed.	
		2	Click Contact Us.	Contact information/page should open.	
		3	Observe the destination.	Correct contact information should be displayed.	
TC-FOOTER-004 - Verify footer layout					
TS-FOOTER-001	TC-FOOTER-004	1	Scroll to the bottom of the page.	Footer should load completely.	

		2	Observe footer elements.	Links, branding and copyright information should be properly aligned and readable.	
TS-UI-001 - Verify General UI					
TC-UI-001 - Verify page loading					
TS-UI-001	TC-UI-001	1	Open Tripva.in.	Website should load successfully.	
		2	Observe the page.	No major broken elements or error messages should be displayed.	
TC-UI-002 - Verify page scrolling					
TS-UI-001	TC-UI-002	1	Open the home page.	Page should load.	
		2	Scroll from top to bottom.	Page should scroll smoothly through all sections.	
		3	Scroll back to top.	User should be able to return to the top correctly.	
TC-UI-003 - Verify responsive layout					
TS-UI-001	TC-UI-003	1	Open the website on a desktop browser.	Page should display correctly.	
		2	Resize the browser window.	Layout should adapt appropriately.	
		3	Observe sections and controls.	No major overlap, clipping or broken layout should occur.	
TC-UI-004 - Verify countdown display					
TS-UI-001	TC-UI-004	1	Navigate to the countdown section.	Countdown should be displayed.	
		2	Observe the values.	Days, hours, minutes and seconds should be displayed correctly.	
		3	Wait and observe.	Countdown should update automatically according to the configured launch time.	
TC-UI-005 - Verify Trust section					
TS-UI-001	TC-UI-005	1	Navigate to the Trust section.	Section should be displayed.	
		2	Observe the listed trust points.	Security, speed, partners and user-experience information should be displayed correctly.	
TC-UI-006 - Verify browser compatibility					
TS-UI-001	TC-UI-006	1	Open Tripva in a supported browser.	Website should load correctly.	
		2	Navigate through major sections.	Major UI elements and links should function correctly.	
TC-UI-007 - Verify page content readability					
TS-UI-001	TC-UI-007	1	Scroll through the complete website.	All sections should be accessible.	
		2	Observe headings, descriptions and buttons.	Text should be readable and not overlap with other elements.	
TC-UI-008 - Verify external/follow links					
TS-UI-001	TC-UI-008	1	Navigate to the Follow Our Journey section.	Section should be displayed.	
		2	Click each available social/external link.	Corresponding destination should open correctly.	
TC-UI-009 - Verify website on page refresh					

TS-UI-001	TC-UI-009	1	Open the Tripva home page.	Page should load correctly.	
		2	Refresh the browser multiple times.	Website should reload without errors or broken layout.	
TC-UI-010 - Verify copyright information					
TS-UI-001	TC-UI-010	1	Navigate to the bottom of the website.	Footer should be displayed.	
		2	Observe copyright information.	Copyright text should be displayed correctly.
